PRINTING AT DIGITAL SPEED

Digital textile printing has become one of Abed Textile's defining manufacturing strengths. Investment in high-speed digital systems supports design flexibility, quicker changeovers and industrial-scale production while reducing several preparation stages associated with conventional printing.

Single-pass digital printing forms part of this transformation. Production and printing capacity now stands at 120,000 metres per day, supported by high-speed systems and experienced technical teams.

DESIGN FLEXIBILITY

Efficient handling of complex and changing designs.

FASTER CHANGEOVER

Less preparation when moving between designs.

PRINT PRECISION

High-detail image and colour reproduction.

PRODUCTION FLEXIBILITY

Adaptability across changing order requirements.

RESOURCE EFFICIENCY

Fewer conventional preparation and printing stages.

TECHNOLOGY HIGHLIGHTS

Single-pass · High speed · Advanced printheads · Controlled environment · Colour management
