BETTER MANUFACTURING THROUGH BETTER RESOURCE USE

For a textile-processing company, sustainability is closely connected with how water, energy, chemicals, materials and production resources are managed. Abed Textile's approach should link environmental responsibility with measurable manufacturing improvement.

The transition toward digital printing is one example of how technology can support operational flexibility and resource efficiency. Final claims should be supported by verified factory data.

WATER STEWARDSHIP Measure, reduce, reuse and improve.	**CHEMICAL MANAGEMENT** Control sourcing, storage, use and compliance.	**ENERGY EFFICIENCY** Improve utilities and production performance.	**WASTE REDUCTION** Prevent, recover and manage responsibly.
RESPONSIBLE PRODUCTION Connect sustainability with operations.	**PEOPLE & SAFETY** Protect people through systems and training.	**ENVIRONMENTAL COMPLIANCE** Meet applicable requirements and customer expectations.	**CONTINUOUS IMPROVEMENT** Use data, targets and review cycles.

Management → Sustainability Leadership → Environment / Chemicals / Energy / Safety / Production → Data → Targets → Review → Improvement
