# BUILT ON EXPERIENCE. DRIVEN BY PROGRESS.

For more than three decades, Abed Textile Processing Mills Limited has grown alongside Bangladesh's textile industry. Established in Narsingdi in the early 1990s, the company evolved from local textile manufacturing into an integrated operation covering weaving, dyeing, printing, washing, finishing and digital textile printing - with 18,000 workforce.

Today, Abed Textile combines established manufacturing knowledge with advanced digital printing technology and continued investment in technical capability. The direction remains clear: strengthen local manufacturing, respond faster to changing markets and build for the next generation of textile production.
